SOCIETY

Revised Edition
by **ELY CHINYOY**, *Smith College*

Random House, July 1967; about 488 pages; about \$6.95

Incorporating considerable recent research and scholarship, this rigorous total revision offers a provocative and systematic introduction to the study of society. This new edition includes two new chapters (on education and on social change) as well as a more complete treatment of socialization. Professor Chinoy provides a consistent theoretical point of view that combines functional analysis with concern for social change, while maintaining the lucid expository style that distinguished the first edition.

He probes such important problems as the relations between individual and society, the social conditions that encourage conformity or stimulate deviant behavior, and the causes and consequences of such master trends as bureaucratization, the growth of cities, and the progress of science.

To accompany **SOCIETY . . . A TEACHER'S MANUAL** by M. GLAZER, *Smith College* will also be available.

CHALLENGE OF CHANGE

An Analysis of Social Trends in the United States
by **RAYMOND W. MACK**, *Northwestern University*

Random House, April 1967; about 200 pages; \$3.95

The author takes five components crucial to the survival of society — population, education, economics, politics, and “sense of purpose” — and analyzes the accelerated cycle of change touched off by the Industrial Revolution and subsequent technological revolutions. The emphasis is placed on the effects of such change on American society. The treatment of each component is paradigmatic rather than historical; the author concentrates on the process of change itself and on how its magnitude and pace produce problems different from those ever known before.

CONTENTS:

Preface

1. The Scientific Revolution and the Nervousness of Man
2. Social Organization and Survival
3. Births, Deaths, and Families: American Traits and Trends
4. Education for What? American Traits and Trends
5. Mass for the Masses: The Production and Distribution of Abundance
6. The Politics of Industrialization and the Industrialization of Politics
7. The American Dream and the American Dilemma: A Sense of Purpose in Mass Society
8. The Conformity Question and the Search for Talent

MINORITIES IN A CHANGING WORLD

Edited by **MILTON L. BARRON**,
The City College of The City University of New York
Knopf, December 1966; 508 pages; \$4.95 paperbound

This impressive collection of readings anthologizes the most recent journal and magazine articles (from 1959 to the present) on the dynamics of minority group problems. The book features a series of pieces on representative minority problems in other societies as the background for a better understanding of American minorities. Although the emphasis is on the changing status of the Negro, minorities that originally emigrated from Europe, Asia and Latin America are also considered in some detail. A partial list of the eminent contributors includes: Alexander Bikel, Nathan Glazer, Martin Luther King, Jr., A. Philip Randolph, Marshall Sklare, and Roy Wilkins.

SOCIOLOGICAL THEORY

Its Nature and Growth

Third Edition

by **NICHOLAS S. TIMASHEFF**
Professor Emeritus, Fordham University

Random House, July 1967; about 352 pages; about \$6.50

The most comprehensive synthesis and interpretation of the evolution of sociological theory since Comte and Spencer. In this third edition, the section on the contemporary period has been reorganized, reinterpreted and completely updated to reflect the changing emphasis of sociological theory. With characteristic soundness of judgment, the author analyzes and evaluates the contributions of individual theorists, without losing sight of the historical context from which their concepts evolved.

PERSONALITY AND SOCIAL LIFE

A Textbook With Readings

by **ROBERT ENDLEMAN**, *Adelphi University*

Random House, April 1967; about 600 pages; \$8.95

A sociological approach to personality development and social structure which stresses psychoanalytic techniques. The author maintains his consistent viewpoint — psychoanalytic sociology — by utilizing carefully selected readings. In his analyses, he applies this to aspects of personality and society. Among the considerable variety of subjects discussed are: human language and symbolism, family organization in the Israeli Kibbutz, personality trends in the Soviet Union, the personality of the creative artist, and human behavior in disaster situations.

CONCEPTS, THEORY, AND EXPLANATION IN THE BEHAVIORAL SCIENCES

Edited with Introductions

by **GORDON J. DIRENZO**, *Indiana University*

Random House, November 1966; 320 pages; \$4.95

These original essays by White, Parsons, Lazarsfeld, Levinson and other leading behavioral scientists probe the perennial question of the nature and problems of theory construction and scientific explanation in sociology, psychology, and anthropology. The formation, definition, and measurement of scientific concepts, which constitute a fundamental aspect of theoretical analysis, are given special attention.

THE MODERN URBAN REVOLUTION

by **KINGSLEY DAVIS**, *University of California, Berkeley*

Random House, Summer 1967; about 352 pages; about \$5.50

A scientific analysis of the principles and processes of urbanization by one of the world's leading demographers. The author's essays provide a thorough presentation of the growth of cities and of the impact of city environment on populations, birth and death rates, economic and political structures. Professor Davis focuses on population changeover from agrarian life in the developing countries of Latin America and Asia before turning to city growth in the United States with its implications for the future. The emphasis throughout is on analysis and data rather than on prescriptions and remedies.

ANNOUNCING...

A New Paperback Series . . . **RANDOM HOUSE STUDIES IN MODERN SOCIETIES.** Each book will be an original essay on a particular country, authored by a distinguished social scientist who is, in most cases, a native of the area of which he writes. Future studies will focus on Brazil, Britain, France, Germany, Israel, Italy, Mexico, Poland, Soviet & U. S., and Spain.

DUTCH SOCIETY

by **JOHAN GOUDSBLOM**

This comprehensive description of Dutch society presents both the general features that society shares with other modern Western societies and many particular features that persist even under the leveling impact of modernization. The interplay of the "indigenous" — in particular the tradition of bourgeois leadership and that of religious diversity — and the "modern" is elucidated in a concise historical perspective and is a basic theme throughout.
